

I am against the provisions of Docket 02-277. I see NO PUBLIC GOOD coming from the changes to broadcast ownership proposed in this proposed rule change. Single corporation ownership of diverse information sources conceviably amount to no more than a tacit MINISTRY OF INFORMATION sanctioned by the United States. How such a policy is seen by the FCC as justifiable and in the public interest would be interesting. If such justification exists, I hereby request such a document be sent to my above e-mail address.
